

THE BEERS

From opening on Wednesday evening around 850 beers should be available to choose from, if they are ready. Then around 200 further beers will go on sale later in the festival once there is room on the stillages. This is to ensure that there is still a good selection of beers available throughout the festival.

The beers on sale from the start are numbered to help you spot them on the bar. The reserve beers are marked “RES”, apologies if these appear in a slightly random order, as they have to be fitted onto the stillage as space permits.

Beers marked **V** are not fined with isinglass and are therefore suitable for vegans and vegetarians. Gluten Free beers are marked “**Gluten Free**”
Breweries marked “**LocAle**” are situated within 20 miles of the festival.

KeyKeg.

For the first time this year we are offering beers served from a KeyKeg. These are real ales sold from a plastic container inside which is a bag in which the beer is stored. The beer is served by applying air pressure to the outside of the bag, which squeezes it and forces the beer to the tap. These beers are sold in some bars with the meaningless title of “Craft Beers”. Much so called “craft beer” is not real ale, so it is difficult to know, when faced with what looks like a keg tap, whether it is real or keg. At least you know that all such beers at this festival are real. KeyKeg beers are clearly marked “**KeyKeg**” in this programme. There is a dedicated KeyKeg Bar in the main arena and some brewery bars will also offer some KeyKeg beers.

Unfortunately, KeyKegs are non-returnable and many end up in general non-recycled waste. We have ensured that all KeyKegs used at this festival will be returned to the manufacturer to be recycled.
